Crimping Pliers for Western plugs

Now revised:
Improved opening mechanism!

Crimping Pliers for Western plugs

Improved opening mechanism:
The proven pliers now crimp even better!

- ▶ New: improved opening mechanism, optimised design, less weight
 - ▶ Can be used to crimp 4-, 6- and 8-pin Western plugs
 - ▶ For cutting and stripping flat, unshielded telephone cables
- > Precise crimping process thanks to parallel crimping
 - > Repetitive, high crimping quality due to integral lock (self-releasing mechanism)
 - > High transmission of force thanks to lever action for fatigue-reduced working
 - > For Western plug type RJ 10 (7.65 mm wide), RJ 11/12 (9.65 mm wide) and RJ 45 (11.68 mm wide)
 - > With length cutter and stripping knife for ribbon cables 6 and 12 mm length
 - > Head burnished, two-colour dual component handles
 - > With additional stripping device for round cables
 - > One for all: three separate crimping dies enable you to crimp all standard Western plugs
